

# PRESCOTT CANCER CENTER

This project brings state-of-the-art oncology care to the tri-county area, servicing a greater number of clients closer to the communities where they live.

**Location:** Prescott, AZ

**Markets:** Healthcare

Working collaboratively with partners Arizona Oncology, NexCore Group, and Corgan, we recently delivered a new 23,000SF cancer center, serving patients in Prescott, Prescott Valley, Chino Valley, and Dewey-Humboldt.

The cancer facility will allow AZ Oncology to offer medical oncology, surgical oncology, breast cancer treatment and diagnostics, urology services, radiation therapies (including HDR), diagnostic imaging (CT/PET, CT) laboratory diagnostics, genomic testing, nutrition services, oncology research and pharmacy, lab and hematology services. A 35-chair infusion area overlooks the garden and was prioritized to include natural light for the patients.

The Prescott Cancer Center features urology services, radiation therapy, diagnostic imaging, and more.

Our team sets the standard for the construction of hospitals, outpatient clinics, specialty clinics, behavioral health facilities, surgery centers and specialty imaging suites. Our commitment to health and safety is second to none, and we're one of only six general contractors in Arizona to earn the prestigious VPP Star safety rating.

The facility is equipped with four infusion bays and room to grow.
